

SOUTHWEST AN IDEAL PLACE FOR FIGHT ON GREAT WHITE PLAGUE

"Sun Cure" May Be Used Best in This Section, Says the Speaker at Medical Convention—Long Hours of Sunshine and Freedom From Snow Additional Advantages Offered By This Section.

THIS southwest, whose climate is perfect is sunshine, presents the ideal climate for the world for the treatment of tuberculosis by means of heliotherapy, or the "sun cure."

This point was emphasized by Dr. A. G. Shurtliff, president of the Medical and Surgical Association of the Southwest, in his annual address, delivered this afternoon at Hotel Sheldon, at the annual meeting of the association, which began yesterday morning with clinical work at the local hospitals.

Dr. Shurtliff used as examples cases that have come under his observation as associate medical director of the Albuquerque sanatorium.

Ahead of Switzerland.—At present we are ahead of Switzerland as that country is superior to the rest of Europe.

"The hours of sunlight are longer here and the percentage of sunshine much greater. The treatment can also be taken much more comfortably, owing to our freedom from snow. The winter front will be shown tonight at 10 North Oregon street, as a compilation of the El Paso County Medical society.

Tanning Important Element.—Tanning is an important element of the treatment, according to Dr. Shurtliff. Red-haired persons do not do so well under the treatment because they do not tan easily, he said.

Dr. Shurtliff emphasized the dangers of using the treatment without constant supervision. The tendency was to overdo the treatment and take too long exposure. When this was done, there was likely to be fever running quite high, followed by marked depression for several days.

Dr. Shurtliff a Pioneer.

In the last issue the treatment is not as successful as in the other types, but, in Dr. Shurtliff's opinion, is a great help even in those. In a number of cases, the kidney, bowels, pancreas, glands, etc., good results could be expected.

In America the treatment has been used very little, Dr. Shurtliff being one

of the first to utilize it. He has found that the details of treatment must be modified in the southwest, on account of the intense sunshine in this district.

Clinical Work Done.

The members who are with the various local hospitals, the following doctors operated at Hotel Sheldon: James Vans, endocrinologist; Mrs. H. M. Melkenson, Prof. Stanton, N. M., pathologist; Dr. L. T. Hart, Dr. J. C. Hart, Dr. J. E. Hart, Dr. W. J. Hart, Dr. E. H. Carpenter, two extracts, two removals of the eye, and two removals of tonsils.

The operations at the new El Paso Hospital were performed by Dr. G. N. Thomas, on Mrs. May Binney, 1921 Montana street, for appendectomy, peritonitis, and emphysema of the uterus; and the other, on Mrs. D. T. Miller, for appendectomy. Gallstones were removed.

Today the president's address, the program at the afternoon session consisted of the reading of technical papers by several experts of the southwest. Motion pictures showing the progress of the war will be shown tonight at 10 North Oregon street, as a compilation of the El Paso County Medical society.

Instrument Dealer Here.—An interesting figure in attendance at the treatment, according to Dr. Shurtliff, is H. McChesney, president of Kirby Instrument company, of Dallas, who years ago as a salesman drove all of west Texas with a team and buggy, besides traveling in New Mexico in the days before the automobile. He probably knows more doctors by their first names than any other surgical instrument man in Texas and is having a most enjoyable time renewing acquaintances with old friends, many of whom have moved in to the larger centers and are now the leading men in their profession.

The Kirby Instrument company has a large collection of medical and physician supplies in room 222 Hotel Sheldon, for the inspection of the resident and visiting physicians at the convention. E. H. McChesney of Dallas, is in charge of the exhibit.

WORK NOW FOR BRIGADE POST

5767 GUARDSMEN ORDERED HOME

Maj. Saville Tells Rotarians of Work Contemplated On Winter Quarters.

There is a probability of all the troops now in camp at El Paso being mobilized in border service was today designated by Maj. Gen. Frederick Farnham to go home. He acted under orders from the war department to select between 5000 and 6000 troops for release.

A newer system to accommodate all the units is to be a feature. This was the inference made by Farnham Thursday at their weekly luncheon at Hotel Sheldon, from the talk of Maj. Mathew E. Fossile, of the construction quartermaster's department at the

time he was in command of the

units.

The major intimated that now is the time for El Unions to get busy if they wish to secure a brigade post for El Paso. He announced that during the past four months about 15,000 truck loads of material had been handled through the local depot, and that even greater activity might be expected during the coming months.

Maj. Saville complimented El Paso on its natural steady growth, during the city's present status, not in the nature of temporary boom.

Show Will Winter Here.

A. Powers, general manager of the Warham shows, told the Rotarians that his organization, with about 1000 people, would spend the winter in El Paso. It shows its shows next week in this city. He said: "If you see a board off anywhere, remember me." There are always plenty of people to pull down those who are up, but what we want is the booster who will help to put others up. There is too much of this shattering of ideals; too little of this helping others."

Costs Less To Live Here.

R. B. Granoff, president of the chamber of commerce, who recently returned from a trip east, told the Rotarians that it cost in New York. He commented on a large number of El Pasos he had met in New York, having counted 28, he said, during his three days' stay. His announcement that the late George Bolte, called the father of the El Paso business in America, had got his start in El Paso as a restaurant man was greeted with much applause.

Robert Krakauer, another El Pasoan who has been spending some time in the east, said that he liked El Paso and its people. It is true that there are always plenty of people to pull down those who are up, but what we want is the booster who will help to put others up.

Chaplin Channing said the shows were to present their best for the purpose of raising funds to build a place of worship and entertainment for his men.

Capt. A. P. Watts passed through the audience and sold tickets to the Rotarians. Everybody bought from 25 cents worth upward.

RAILWAY ISSUES ARE ADVANCING

Moderate Recessions Occur, But Are Balanced By Gains in Same Quarter.

NOTE.—(Continued, yesterday, page 12.)

Thursday, Dec. 7.—Restraint railway companies continued their advances in the grain market today, on further news of absorption. Wheat and oats were being most consistently advanced by the railroads, the western and northeastern groups moving at an appreciable advance, the movement of wheat overshadowing the market.

Moderate recessions occurred in representative stocks, but these were balanced by gains in the coal, building, general merchandise and transportation issues to those points with fluctuations.

Bonds were again irregular, with a new record for 30-year bonds set by the Standard & Poor's index, and a further substantial advance in American Government bonds, with marked gains in 30-year participation certificates.

Unwelcome rains have bullish effect on corn; oats sag, then rise.

Chicago, Ill., Dec. 7.—Peak strength developed in the wheat market today, owing to prospects of additional export buying.

There were indications that similar conditions would prevail in the grain market, and estimates were current that France alone would this season require imports of 2,000,000 bushels of wheat.

Concerns, which ranged from the lowest of Wednesday's finds to the highest, with May at \$1.81½, June 1.75 and July at 1.71½, were followed by a modest advance, and then a substantial advance.

A decline in late gains in amount of grain stocks, but these were balanced by gains in the coal, building, general merchandise and transportation issues to those points with fluctuations.

Bonds were again irregular, with a new record for 30-year bonds set by the Standard & Poor's index.

Strength in the grain market was only of a

moderate character.

REPORTS OF increased country offerings had substantially increased in price, particularly in the case of the North Atlantic.

Commodity houses were mostly on the buying side in the state crowd.

Electrical receipts of late weakened gradually, and then rose.

Industrial stocks had a bullish effect on corn. After opening slightly higher, the market sagged a little, but soon turned around.
